**Re: Performance Certificate of the Normax make 200 mm Ball Type Non-Return Valve.
Order No. 1L-8744**

One no. 200 mm Normax make ball type non return valve has been used in our Quenching Station No. 2 of Top Charge Battery in September 2001 in place of problematic flap type.

We find the Normax make valve is working satisfactorily for last four months without any problem.

Head, Top Charge
